SUMMARY

Overall 11 years of Experience in Product Development Industry with Innovation and Excellence. Expertise in Automation of Complex workflows/Processes with event driven Applications. Adept at working effectively to achieve goals both as a cross-functional team member and individual contributor.

EXPERIENCE

08/2021 – Present
Remote

Apollo 247, *Principal Engineer*

- Event-Driven Architectures: Spearheaded the design and architecture of a high-throughput, real-time analytics platform, processing over 150 million events per day.
- Knowledge Sharing: Mentored junior software engineers, ensuring team productivity boost through adoption of best practices in code quality and automated testing procedures.
- Strategy and Architecture: Initiated an internal Architecture and code review culture that reduced software and fostered a robust and resilient architecture.
- Development: Authored and maintained over 300,000 lines of Typescript and Java code, resulting in a robust and maintainable software base that served as the foundation for critical business applications.

07/2019 – 08/2021
Remote

Safe Security, *Platform Engineer*

- Centralized Logging: Implemented centralized logging library in sync with ELK for monitoring and alerting on critical events.
- Telemetry and Monitoring: Utilized TIGK stack for real-time monitoring, anomaly detection, and alerting.
- Code Modernization: Migrated the codebase from PHP to TypeScript for better scalability and maintainability.
- Cybersecurity Controls: Implemented programs to assess breach probability and compromise risk.
- Dockerization: Transformed monolith SAFE application to micro-services for efficient development and deployment using docker and kubernetes.
- Agent Deployment: Developed a self-installable and auto-upgradable SAFE agent for secure data collection and transfer.

11/2016 – 07/2019
Delhi, India

StalkBuyLove, *Lead Software Engineer*

- API Gateway : Created a micro-service oriented architecture outside of a monolithic framework Magento for routing purposes and yet use Magento for CRUD operations along with session management.
- SBL Logistics Automation Dashboard: Automated Order Logistics Including Operations like Recommendation, Registration, Tracking, RTO, NDR, Multiple Re-Dispatches.
- Refund/Exchange Module: Designed And Implemented Module From Scratch For Returning the Article(s) or Exchanging Multiple times By Shipping Self Or Using SBL's RVP service.

12/2015 – 11/2016
Gurgaon, India

Angular Technologies, *Senior Software Engineer*

05/2015 – 12/2015
Gurgaon, India

Blinkit, *Software Engineer*

EDUCATION

07/2011 – 04/2015
Guwahati, Assam

B.Tech, ECE, *Indian Institute of Technology* 
CGPA: 7.8

SKILLS

- | | | |
|--------------|-------------|-----------------|
| • DSA | • LLD | • HLD |
| • TypeScript | • NodeJS | • MySQL |
| • PostgreSQL | • GraphQL | • AWS |
| • GCP | • Redis | • ElasticSearch |
| • REST API | • MongoDB | • Java |
| • Python | • GenAI | • Docker |
| • RabbitMQ | • Kafka | • Bash |
| • Nginx | • ReactJS | • Ubuntu |
| • Ansible | • Terraform | • CursorAI |

KEY ACHIEVEMENTS

Investment of worth 25 Million in ESOPs of present and past organizations

Recipient to Cloud Infrastructure migration Award at Google Gurugram

- Directed the transition of legacy Apollo247 on-prem systems to the GCP cloud, reducing infrastructural costs by 30% and enhancing system resilience.

Apollo247 Payments Service

- Successfully implemented super critical payment services from scratch across all Apollo24/7 verticals with daily transactions of 4Cr.

Championed Rewriting and optimizing Legacy Code and processes to Maximizing Performance

Cracked IIT JEE 2011 with Admission offer
